

EJOT Storm Washers

- **Product Group** A range of washers designed to seal against the crown of a profile to ensure a safe secure seal against the ingress of water.
- **Design** The washer profile is designed to follow the crown of sheet. Structural ribs are utilised to give added wind uplift resistance.
- **Assembly** All storm washers are supplied with bonded, open cell, EPDM to form a water-tight barrier seal against the sheet when compressed.
- **Finish** Storm washers are supplied with a blank aluminium finish. A textured finish can be specified should the detail require it.
- **Colour Matching** All storm washers can be powder coated for colour-matching with your sheet. Please specify a BS or RAL reference when ordering.
